PROFESSIONAL SUMMARY

Frontend Engineer with multiple years of experience building modern, high-performance web applications. Specialized in TypeScript, React, Next.js, Tailwind CSS, Astro, with additional experience in Node.js (Fastify), PostgreSQL, DrizzleORM and React Native. Experienced in developing SaaS platforms, real-time applications, AI-driven products, marketplaces, and logistics solutions. Passionate about creating intuitive user experiences, solving complex technical problems, and delivering scalable, production-ready software.

EDUCATION

Bachelor of Engineering in Information Technology and Systems **2026**
MB University Belgrade Belgrade, Serbia

Information Technology Technician **2020**
Electrotechnical high school (Elektrotehnička škola) "Nikola Tesla" Niš, Serbia

WORK EXPERIENCE

Lead Frontend Engineer **Sept. 2025 – Present**
Xferdata – xferdata.com

- Lead frontend development of an AI-driven platform for data valuation and monetization through auctions.
- Collaborate with product and engineering teams to turn complex data workflows into intuitive user experiences.
- Take ownership of frontend development from planning and implementation through delivery.
- Developed both administration portal and client side user interfaces.
- Took part in developing infrastructure to accommodate both applications.

Lead Frontend Engineer **Dec. 2023 – May 2025**
Tenderr – tenderr.rs Niš, Serbia

- Lead frontend development of a marketplace platform connecting handymen, contractors, and freelancers with customers across Serbia.
- Manage the technical direction and development of the platform.
- Coordinate product requirements and translate business needs into technical solutions
- Managing communication and workflows between internal teams.

Frontend Engineer **Aug. 2021 – May 2025**
MotionOps – motionops.com Niš, Serbia

- Developed the frontend of MotionOps, a real-time application for managing handymen and specialist teams.
- Built responsive and interactive interfaces using React, TypeScript, and Tailwind CSS.
- Implemented complex workflows for managing teams, jobs, and operational data.
- Contributed to frontend architecture, UI development, and ongoing product improvements.

Frontend Engineer **July 2020 – Aug. 2021**
Feedback - feedback.com Dubai, UAE

- Developed a web application for a startup focused on real-time office-space networking and collaboration.
- Built responsive frontend interfaces and interactive application features.
- Worked closely with the startup team to translate product requirements into functional web experiences
